

INTRINSICALLY SAFE

LOCATION BEACON

Features

Intrinsically safe

Precise location technology

Floor plans and location names

Long battery life

IP65 sealed

Easy setup

Compact design

RESPOND TO INDOOR INCIDENTS WITH PRECISION

Precise positioning empowers emergency response

In certain facilities, GPS signals alone may not provide sufficient positioning precision to locate employees during an emergency response. In such circumstances, every second counts and time wasted searching for someone could mean the difference between rescue and recovery.

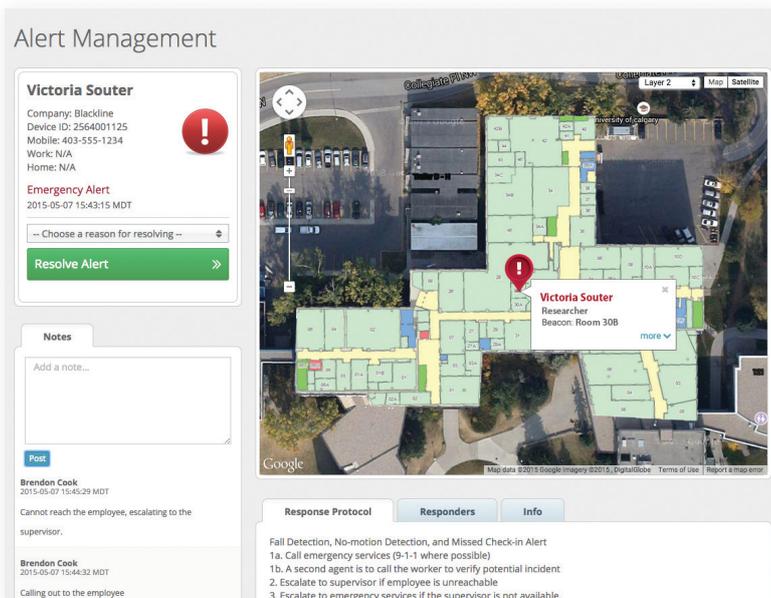

Blackline Safety addresses this challenge through introduction of our location beacons—compact, wireless positioning transmitters. Installed throughout facilities, each beacon is installed where employees operate, from one per floor to one per room depending on your facility needs. Beacons are then placed on your custom floor plan so you always know exactly where your people are. The affordable beacons are self-powered and wireless, taking only minutes to install without any calibration or triangulation.

Each beacon broadcasts a unique identity number that is received by Blackline Safety's monitoring devices, including G7c and Loner M6. When personnel are within proximity of beacons, monitoring devices store the nearby beacon identities and reports their location to Blackline Live.

Protect the safety of your workforce with Loner Beacon indoor location technology.

Easy Loner Beacon Battery Replacement

## DETAILED SPECIFICATION

### Size & Weight

Size: 161 mm H x 40 mm W x 32 mm D (6.4" x 1.6" x 1.3")

Weight: 210 g (7.4 oz)

### Mounting

Mounting bracket included

Mounting methods: screws, tie straps, adhesive

Mounting options: walls, wall corners, poles, etc.

### Buttons & Indicator Lights

Single button for powering on/off plus configuration

Green LED for power indication and configuration

Red LED for low battery indication

### Wireless Communication

Indoor positioning radio: 2.4 GHz to supported Loner safety monitoring devices

### Location Technology

Low-power continuous beacon signal enables

Loner safety monitoring device proximity

detection

### Beacon Signal Range

Four configurable signal range levels between 4.5 m and 36 m (15 ft and 120 ft) line of sight (less range when obstructed)

### Notification Messages

Low Battery communicated by Loner safety monitoring devices

### Power & Battery

Batteries: two C-cell alkaline (included)

Battery life: 5 years continuous operation at highest power setting, no wiring required

### Environmental

Storage temperature: -40 to 65° C (-40 to 149° F)

Operating temperature: -20 to 55° C (-4 to 131° F)

Ingress Protection: IP65

### Regulatory Compliance

Class I, Div 1, Groups A-D, T4

ATEX:  II 1G, Ex ia IIC T4 Ga

IECEX: Ex ia IIC T4 Ga

RoHS

FCC ID: W77BCN

IC: 8255A-BCN

### Device Requirements

Loner Portal user account with activated, compatible Loner safety monitoring devices

### Warranty

One year limited factory warranty

### Wireless Coverage and Activated Service Plans

2.4 GHz operation regions: global

Service plan options: no service plan required

### Blackline Live Web Application

Features Include: Beacon map editor, alarm banner, event history, device location mapping, device

management, alert & notification settings and more

**Comprehensive safety alert life cycle management:**

includes alert configuration profiles, safety protocol, and emergency contacts
