OVERVIEW

The **Loner Mobile app** lets you automate employee check-ins on your smartphone. In an emergency, monitoring personnel can pinpoint your location and can quickly respond.

SOS Button is a wearable device that pairs with Loner Mobile to trigger an SOS alert or confirm a pending alarm.

Paired via low-power Bluetooth®, Loner Mobile and the SOS Button offer an alternative to a lone worker monitoring device.

GETTING STARTED

DOWNLOAD THE LONER MOBILE APP

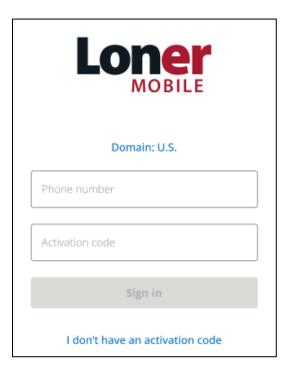

INITIAL SIGN-IN

- 1. Specify your domain (U.S. or EU).
- 2. Enter your phone number to receive a text message with your activation code.
- 3. Enter activation code, then select **Sign in**.

If you don't receive an activation code, contact your administrator or Blackline Technical Support.

NOTE: Loner Mobile requires a data connection, either through a mobile data plan or Wi-Fi.

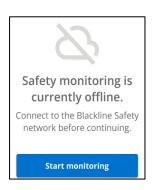

START MONITORING

To connect Loner Mobile to the Blackline Safety Network and start monitoring:

- 1. Tap the power icon or green banner.
- 2. Tap **Start monitoring**. Loner Mobile connects to the Blackline Safety Network.

STOP MONITORING

To disconnect Loner Mobile from the Blackline Safety Network and stop monitoring:

- 1. Tap the power icon.
- Tap and hold **Stop monitoring** for three seconds. Loner Mobile logs off the Blackline Safety Network.

NOTE: Some configuration changes in Settings may require you to turn off monitoring *first*.

MENU BAR

Loner Mobile's menu bar provides quick access to key functions. The appearance varies slightly between iOS and Android versions, but the layout and functions are identical.

PAIRING AN SOS BUTTON

Before pairing, ensure the following:

- Bluetooth is enabled on your phone.
- SOS Button is powered on.
- Monitoring is turned OFF in Loner Mobile (required to add Bluetooth accessories).

To pair SOS Button with Loner Mobile:

- 1. Tap **Settings**.
- 2. Select Bluetooth devices.
- 3. Tap **Scan** to search for SOS Button.
- 4. Select your SOS Button from the list of active devices to complete pairing.

Once connected, the **Bluetooth Device Battery Level** icon displays.

Keep your SOS Button and smartphone within five meters of each other. If the connection is lost, Loner Mobile displays a grey Bluetooth icon and a lost connection notification.

KEY FEATURES

CHECK-IN TIMER

The check-in timer counts down and displays the time remaining until your next check-in.

When a check-in is required, a pending alarm sounds. If you don't confirm within 30 seconds, a red alert is sent to monitoring personnel.

To confirm you're OK:

To check in early and reset your timer:

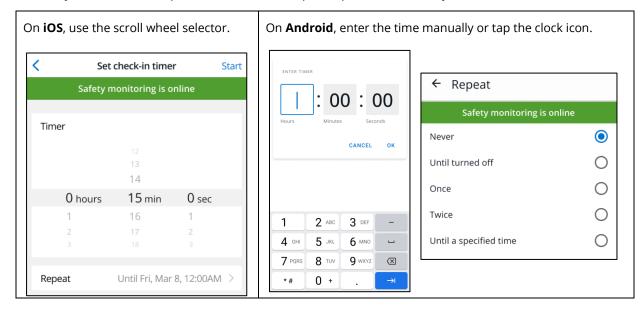

1. Tap **OK** or press the SOS Button once.

1. Tap **Check-in** from the main screen.

Customizing the check-in timer

You can customize the timer if your Loner Mobile account has configuration permissions.

- 1. Tap **Start timer** if the timer is disabled or **Change timer** if a timer is already running.
- 2. Enter your countdown period, then select repeat options under **Repeat**.

Timer repeat options

Option	How it works
Never	Counts down once, then asks for check-in before turning off
Once	Counts down, asks for check-in, repeats once, then turns off
Twice	Counts down, asks for check-in, repeats twice, then turns off
Until Turned Off	Counts down, asks for check-in, repeats until manually turned off
Until Specified Time	Counts down, asks for check-in, repeats until set time, then turns off

SOS FEATURES

SOS Slider

The **SOS Slider** allows you to contact monitoring personnel in an emergency by sending one of two types of SOS alerts:

SOS Alert (sound enabled)

Slide SOS Slider to the right.
This initiates a three-second countdown before the SOS Alert is sent. A confirmation message displays with the option to Acknowledge and check in.

Silent SOS Alert (sound and vibration disabled)

 Hold SOS Slider for three seconds to send a Silent SOS Alert.

This initiates a three-second countdown before the Silent SOS Alert is sent.

A confirmation message displays with the option to **Acknowledge and check in**.

NOTE: You can configure SOS Button to send *either* SOS Alerts or Silent SOS Alerts – not *both*. Check Loner Mobile's settings to see which option is enabled.
